

STRYKER™

ABC HAMMERS^{UNZ}

YOU ASKED FOR IT, WE DELIVERED POUND FOR POUND, THE WORLD'S STRONGEST HAMMER

1. Drop Forged Steel Head

Our high visibility steel heads conform to ANSI, BS876 & ISO 15601 specifications and the faces are induction hardened to 50-58 HRC with a superior grain structure for extended life.

2. Thickened Boss

Further protects from countless overstrikes.

3. Superior Quality Rubber

The abrasive-resistant rubber is injected all the way into the eye of the hammer. The rubber in the eye inhibits the transfer of shock into the handle, reducing fatigue and the risk of injury.

4. Steel Reinforced Lanyard Hole

Safely secures the hammer to wrist or stationary object.

5. Positive Locking Plate

Our innovative locking plate design and unique bonding process ensures the head will never separate from the handle.

6. Ergonomic Shape

Our handle is shaped to provide a comfortable secure grip in both wet and dry conditions, making it the ultimate in safety and reliability.

7. High Tensile Steel Rods

Our handle consists of high tensile spring steel rods, which are molded in a very strong and abrasive-resistant rubber, making it unbreakable with superior durability.

THE ORIGINAL RUBBER HANDLE SLEDGE

With over 6 million units sold worldwide, this is the hammer that all others try to imitate.

XHD412S	4.0 lbs/1.8 kg	12"/300mm	Steel Reinforced Poly	Drop Forged Steel

The XHD Series sets a new standard in unbreakable technology and was built with cost in mind. Our innovative, high performance handle is engineered using a reinforced spring steel rod encased in a high impact resistant co-polymer material specially formulated to meet the rigorous requirements of every type of environment. Our unique steel locking plate design ensures the head will never separate from the handle. The new shock absorbing, non-slip handle provides less recoil and boasts a reinforced steel lanyard hole for added safety. Our hammers will outlast wood or fiberglass hammers by thousands of overstrikes.
